typst-design

Bassel El Mabsout's design system, in Typst

Every color is a sample of an OKLCH ramp ◇ structure comes from a capsule rule and a diamond ◇ one serif carries every sentence.

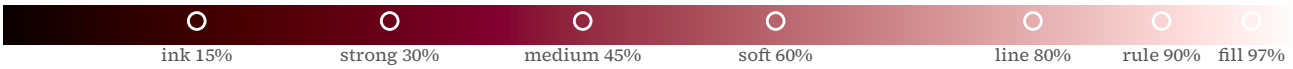

Color

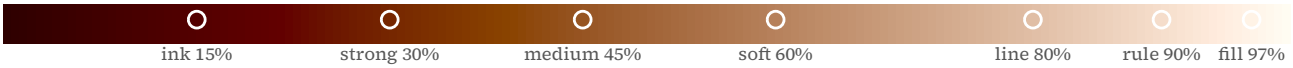

Each ramp is a straight line through OKLCH from black to white at one hue. A color is named by its ramp and a position (`ramps.maroon.sample(30%)`), and the hex beneath each chip is what that position prints, never an input. Change a ramp's few numbers and every heading, rule, callout and plot follows.

THE RAMPS AND WHERE EACH JOB SAMPLES

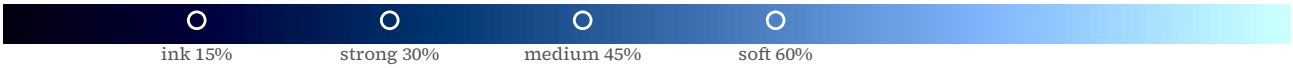

MAROON: IDENTITY

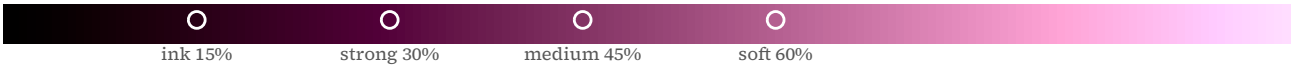

SIENNA: AN IDENTITY IN BROWNISH ORANGE

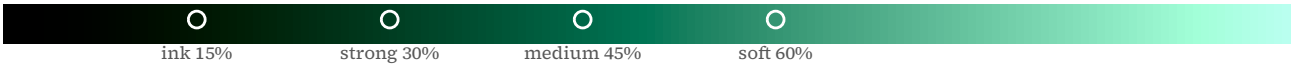

BLUE: OBSERVED, ALGORITHMS

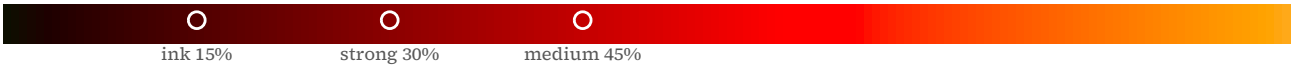

ROSE: ACTED, THEOREMS

TEAL: VALUED, RESULTS

ORANGE: WARNINGS (INTERPOLATED IN OKLAB)

Three rules place every color. Ink tones sit on a 15% grid: ink, strong, medium, soft. Running text sits at medium or deeper, for 4.5:1 contrast. Quiet tones sit at 80, 90 and 97% and carry at most `quietness × (1 − lightness)` *of chroma, so every ramp's washes are equally quiet.*

THE PALETTE

primary #6a001a	**secondary** #922840	**link** #5a0020	**ink** #2b2b2b	**ink-muted** #575757
paper #ffffff	**mark-fill** #fcf2f2	**rule** #f5d5d5	**mark-line** #e4aeaf	

ROLES

The same color marks a role in prose, in equations and in plots: what is observed, what is acted, what is valued.

$$a_t + \pi(s_t) \quad Q(s_t, a_t) = r_t + \gamma V(s_{t+1})$$

CHART SLOTS

Fixed order, never cycled. Neighbors alternate soft (60%) and medium (45%), so they part by lightness too.

chart-1	chart-2	chart-3	chart-4	chart-5	chart-6
#4f82c4	#833364	#349472	#923000	#8c6ebd	#6d5100

CALLOUT TONES

MAROON

wash	line	title	supplement	ink	notice
#fcf2f2	#f5d5d5	#6a001a	#881336	#3e0000	#922840

ROSE

wash	line	title	supplement	ink	notice
#fbf2f7	#f0d5e3	#55023b	#7a2b5b	#280015	#833364

THE FULFILLMENT SCALE

`fulfillment`: bad to good in five OKLCH stops, the identity's crimson through copper, amber and green to the `valued` teal. Low is urgent. Every sample keeps 3:1 on paper, and the ends part by lightness and blue, not only by red and green.

Type and marks

FACES

Source Serif 4: every sentence.
Crimson Pro: names, titles.
SOURCE SANS 3: labels only.
EB Garamond: the CV family.

ONE ×1.2 SCALE

Step 4 21.8pt
Step 3 18.1pt
Step 2 15.1pt
Step 1 12.6pt
Step 0 10.5pt
Step −1 8.8pt
Step −2 7.3pt

HEADINGS DARKEN WITH RANK

1 Chapter
1.1 Section
1.1.1 Subsection
Definition: run in, in ink.

CAPSULE RULE

Round-capped dots, so each reads as a capsule, in the `rule` tone: maroon's quiet 90%.

DIAMOND

Reinforcement Learning ◇ Embedded Systems ◇ Type Theory ◇ Control Systems
Large ◇ and ◇ small it scales ◇ with text

Callouts

Markov Decision Process

A tuple $(S, A, \mathbb{T}, R)$ of states, actions, transitions and rewards.

Theorem 1: Semantic Preservation

A theorem takes the rose ramp, numbered so it can be referenced.

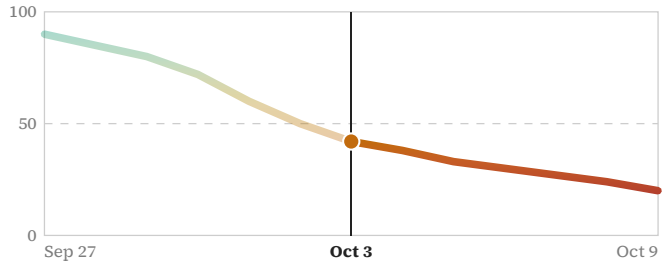

Algorithm 1: Balanced Policy Gradient

An algorithm takes the blue ramp.

Notice: a warning has no title and opens in the orange ramp's 50% sample.

Fulfillment

8% 35% 62% 90% unpriced

`pie`, `price` and `trace`: a value's color is always `fulfillment-color(v)`, a sample of the one scale.
